U.S. Agency for International Development E&E Bureau-CEE Regional Training Workshop

Executive Summary

A total of 31 representatives from the U.S. Agency for International Development (USAID) Central and Eastern Europe missions and World Learning, Inc. participated in a five day Regional Training Workshop from November 1 through November 5, 1999. The workshop, held in Bucharest, Romania, was sponsored by the training office of USAID's Europe and Eurasia (E&E) Bureau in Washington, D.C. The TRANSIT-Support project¹ and World Learning (WL) designed and implemented the workshop in collaboration with the E&E training office. The workshop was facilitated by two Training Resources Group, Inc. staff. (See Attachment 1 for a list of attendees and facilitators.)

By the end of the workshop, those attending had:

1. Shared innovative mission and country approaches and events implemented in the past year.
2. Discussed current USAID/E&E training issues.
3. Participated in hands-on training sessions on how to:
 - Use the Training-for-Results Chain (TRC) to help design and monitor training events that support the achievement of Mission Results Frameworks, and
 - Complete a Training Events Request Form (TERF) using the TRC and the Training Events On-Line (TEOL) system.

The five day workshop included facilitated, interactive sessions on:

- Innovative approaches being used to support in-country, third country and U.S. based training programs.
- Specific programmatic issues related to the World Learning TRANSIT Delivery Order.
- The new TRC Chain Workbook.
- The revised TERF and use of the TEOL.
- The proposed regional training center in Sophia.
- Suggestions for strengthening In-Country Training, Leaving a Legacy, and Monitoring and Evaluation of Training.
- Planning how to use the TRC and TEOL to create a Mission Training Plan.

¹ TRANSIT Support Project team includes the International Science and Technology Institute, Inc. (ISTI) and Training Resources Group, Inc. (TRG) .

Lessons Learned from the Workshop

- The design worked well. There was a high level of active participation and interaction in all of the sessions throughout the workshop.
- The regional and country presentations on Day One were well organized and succinct, and provided an opportunity for group members to hear about the work of their peers. Requesting each region, in advance, to prepare a presentation made the sessions useful and relevant.
- The TRC Workbook was relevant to the work being done by both USAID and AED staff. Following the training session, USAID and AED staff were planning to use the TRC workbook and exercises to
 - develop their mission training plan,
 - brief their own staff on the link between training and the Mission's SOs, and
 - work with TA contractors and other training providers on designing specific training events.
- Participation of both USAID Mission staff and AED staff was useful for discussion and planning purposes.
- Group members actively participated in the small group sessions and produced quality work products, particularly the TRC Planning Phase activity.
- Regional discussion sessions on programmatic issues were substantive and focused on actual problems. Follow-up is needed by the E&E Bureau, TRANSIT- Support, and AED on specific questions raised by field staff.
- The concurrent discussion sessions on the last day of the workshop resulted in specific recommendations on how to improve in-country training, how to enhance in-country capacity building to leave a legacy, and ways to monitor and evaluate training.

The following report provides details about the design, content, and results of the workshop.

Workshop Sessions

Day 1, Monday, November 1, 1999

Monday's Agenda

- Welcome / Introductions / Objectives
- View from D.C.
- Country Presentations
- Programmatic Issues
- Reception

Welcome

The workshop was held at the Crowne Plaza Bucharest Flora Hotel. The opening session included a welcome from Denny Robertson, USAID/Romania Mission Director, who provided an overview of Romania's program which is the largest bilateral program in the region. He highlighted the importance of integrating training into the Mission's programs and discussed the Mission's changing emphasis from individual training to group training. The Mission Director identified several challenges for training providers, including:

- Increasing emphasis on North/South training.
- Regional integration (the desire of the CEE countries to become members of the EU).
- Utilization of ethnic Europeans in U.S.-sponsored training to alleviate the brain drain.
- Coordination of USAID sponsored training with training offered by other U.S. agencies.

Jim Nindel, from the E&E training office in Washington, also welcomed the group and highlighted the importance of training as a developmental tool. He stressed the critical role that USAID and World Learning staff play in ensuring that training is carefully planned to address strategic needs, is of the highest caliber, is innovative, and is carefully monitored. He urged the group members to use the workshop to share experiences, get answers to their questions and learn something new.

Following the welcome presentations, each participant introduced him/herself by giving their name, briefly describing their job and sharing a name card they had designed earlier in the morning.

The facilitators, Kathy Alison and Maureen McLaughlin, provided an overview of the objectives and agenda for the workshop and introduced the guidelines for working together. (See Attachment 2 for the workshop agenda.)

View from D.C.

Following a coffee break, Jim Nindel provided an update on the current situation in USAID/Washington.

Topics included:

- Bureau name change (from ENI to E&E) and the status of the Bureau
- Information on the new Administrator
- Clarification of the role of the E&E Bureau and Global Bureau re training
- Introduction of the E&E Bureau training office staff and clarification of their roles
- Status of funding appropriations / budget for FY 2000
- Status and scope of World Learning's new Delivery Order

Country Presentations

The remainder of the morning and early afternoon focused on country presentations. Each USAID mission / WL country team presented a ten minute overview of successful training activities or events implemented by USAID and World Learning during the last year². A brief discussion followed each presentation. The topic areas covered by the country teams included:

Albania:	Results of a U.S. based training program for "The Garment Ladies", women decision makers who own and operate garment factories. The training resulted in improved productivity, new and better jobs, and purchase of new equipment. – Matty Thimm (WL)
BiH:	Innovative methods being used in Bosnia to support in-country training (ICT), including U.S. trainer preparation, partnering with host-country institutions, using host country experts as co-trainers, using WL staff as ICT facilitators, and how ICT evaluations are being used – Zubeida Kadic (USAID) and Patricia Johnson (WL)
Bulgaria:	Overview of training being provided under each Strategic Objectives (SO) and update on regional initiatives, participatory approach to development of annual training plan and the status of the Human Capacity Development Committee – Nora Ovcharova (USAID) and Julie Dargis (WL)
FR Yugoslavia:	Update on recent activities in Kosovo, Serbia and Montenegro, including a needs assessment being conducted to identify potential training to support USAID programs in Serbia and Montenegro. The Sarajevo mission is responsible for management of USAID interventions supporting the reconstruction process in Kosovo – Julie Dargis (WL)

² Handouts of the presentations were provided to group members during the workshop. Copies are available directly from the TRANSIT staff and World Learning.

Croatia:	Overview of the results of a training program that combined U.S. and ICT on agricultural cooperatives and associations – Jerry Martin (WL)
Hungary / TCT:	Highlights of a regional program on Women Entrepreneurs' Business Networking, which included 21 participants from Albania, BiH, Bulgaria, Croatia, Macedonia, and Romania. – Cecile Kenyon (WL)
Lithuania:	Success story on a series of integrated training activities to provide in-service training for key officials from the Ministry of Finance – Indre Biskis (WL)
Macedonia:	Overview of a program for Civil Society Organization Coalitions. Focus of the program is to help communities and citizens form networks and coalitions to address public policy issues - Matt Brown (WL)
Romania:	Objectives and results of TCT on Community Building in Post Communist Romania - Randal Thompson (USAID) and Bill Saur (WL)
Slovakia:	Highlights of training for GOS high priority activities - anti-corruption, local government decentralization, and banking and enterprise sector restructuring - Zuzana Licakova (USAID) and Regina Connor (WL)

Programmatic Issues

Programmatic issues were introduced in the 3:00 pm session on Monday. Brief presentations were made by Jim Nindel, Jeffrey Shahan and Colin Davies as well as Patricia Poulton and Michelle Wright. The objective of the session was to briefly highlight several programmatic issues and then provide an opportunity for group members to identify specific questions they had about these and other issues.

Presenters discussed the following programmatic issues:

1. In-Country Training (Jeff Shahan)
 - Venue, impact, distance learning
 - Highlights of distance learning in Romania (Bill Saur)
2. Leaving a Legacy (Jim Nindel)
 - What it is and how do we do it
3. In-Country Capacity Development (Colin Davies)
 - Brief introduction to Sandy Shumway's work on the proposed regional training center in Bulgaria
(The group was told that a discussion of existing mechanisms and of the proposed regional center would continue on Friday.)

4. TEOL Update (Jim Nindel)
 - Bureau's expectations/rationale for implementation of the TEOL
 - Status and roll-out schedule
5. TraiNet Update (Pat Poulton)
 - Quick definition of what TraiNet is to be used for (Management/Reporting)
 - Bureau's view – what Missions can do with tool
 - Quick clarification of data collection needs and role of World Learning / Missions / TA contractors (Designated TraiNet coordinators)
6. E&E Training Manual (Jeff Shahan)
 - HAC – will discuss in more detail later in week
 - Pre-existing conditions/waivers
 - Plan C
 - Sending contractor's staff to U.S. training
 - Stakeholder Agreement / Conditions of Training
 - Review of suggestion form for input into development of E&E manual (Michelle)

Identification of Specific Questions on Programmatic Issues

Each table group then discussed and identified critical programmatic questions to be answered before the end of the workshop. Each table brainstormed a list of questions and wrote them on flipchart paper. (These issues were discussed in greater detail during the programmatic issues sessions on Wednesday afternoon and Thursday morning.)

Evening Reception

A reception was held Monday evening at the hotel for the group, local training providers, and representatives from the USAID/Romania Mission.

Day 2, Tuesday, November 2, 1999

Tuesday's Agenda

- Training Session on the Training-for-Results (TRC) Chain

Introduction to the TRC

The focus of the second day shifted to an interactive, hands-on training session on the use of the TRC. The facilitators introduced a new tool, the TRC Workbook, through lecturettes and small group exercises. The workbook was developed by Training Resources Group, Inc. (TRG) in close collaboration with the E&E training office and TRANSIT-Support Project, World Learning and AED³.

The TRC workbook was designed to help Mission program officers, training providers, and TA contractors design, implement, monitor, and evaluate training events and programs that will support the achievement of USAID strategic objectives and results.

The workbook was created to

- clarify how training events and training plans contribute to achieving a Mission's strategic plan;
- define the links of the TRC and explain the step by step process for using the chain to plan training events; and
- provide a reference for using the TRC to complete the Training Events Request Form (TERF) on the Training Events On-Line (TEOL).

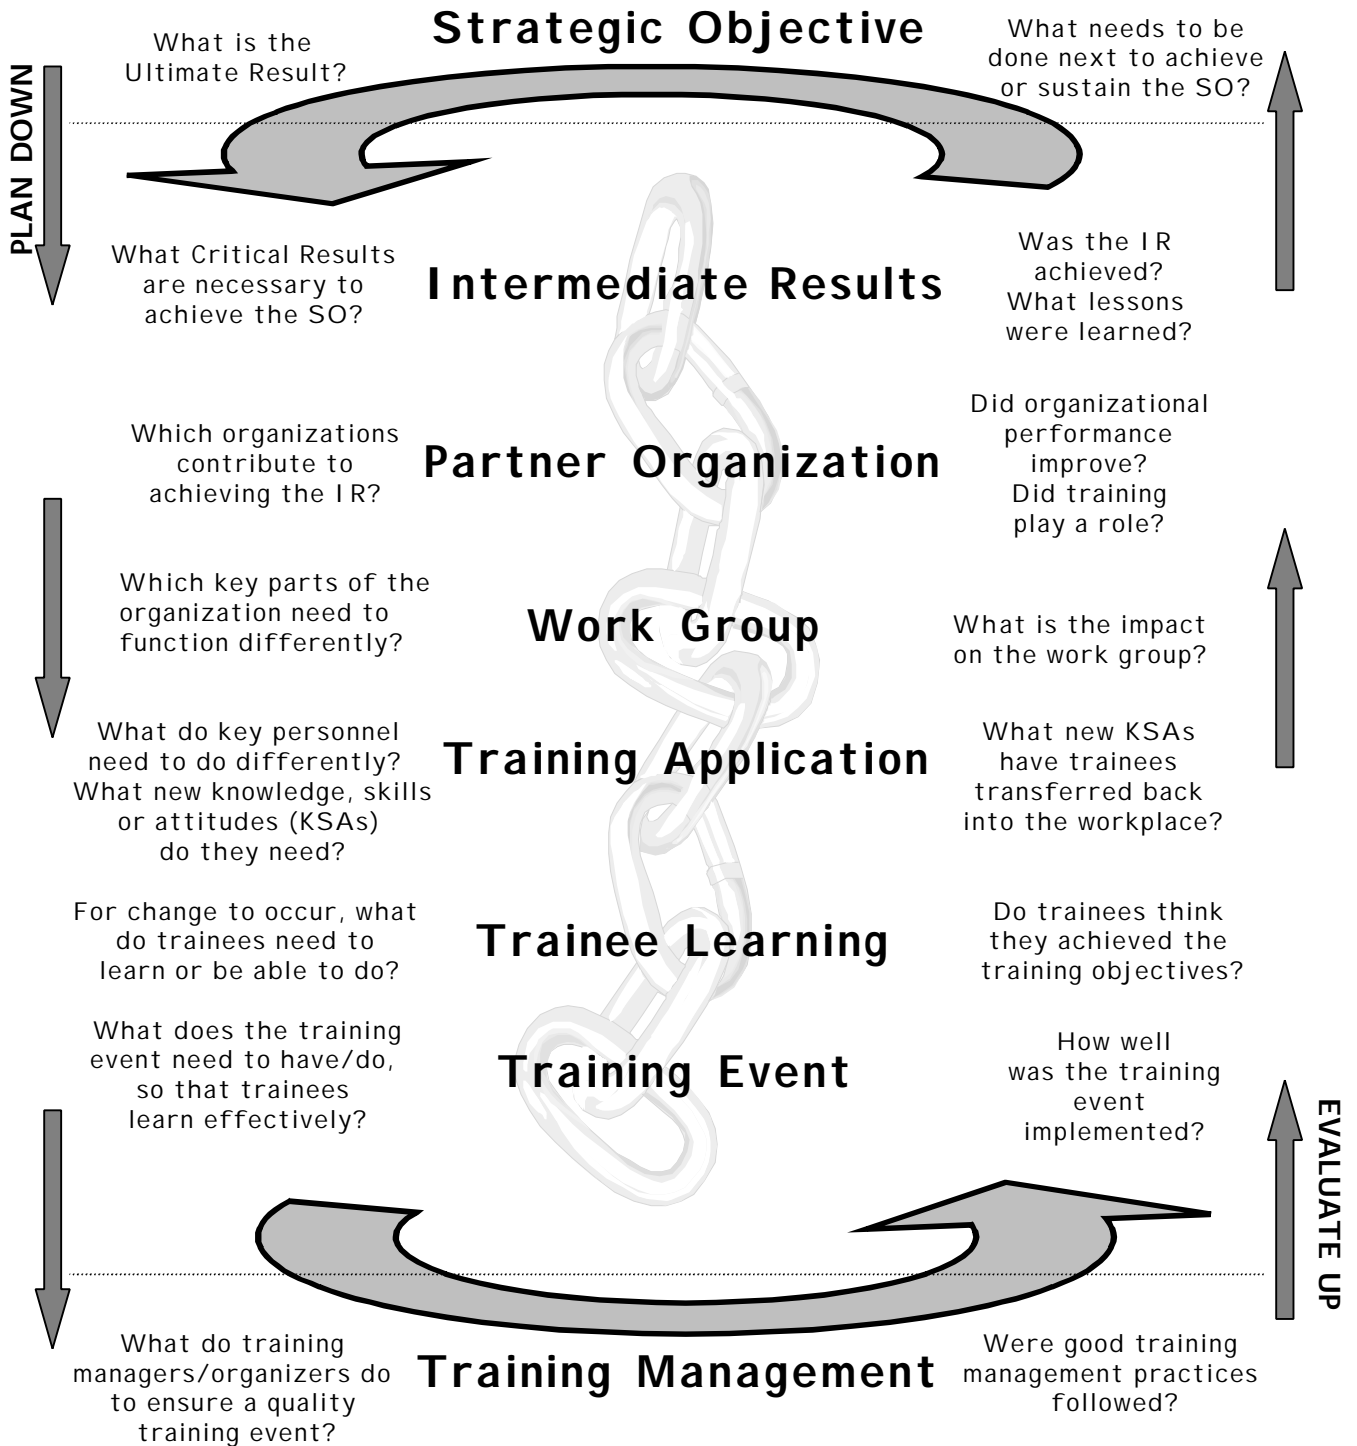

Tuesday's session objective was to provide an opportunity for group members to gain hands-on experience in the use of the TRC to design training events that support the achievement of Mission Results Frameworks.

The morning session included

- An icebreaker to assist group members to reflect on their role in designing training and on their past experiences using the TRC to design training.
- A brief overview of the TRC and the entire TRC workbook. (See the revised TRC on the following page.)
- Highlights of the first four links of the TRC Workbook – the Strategic Objectives, Intermediate Results, Partner Organizations, and Work Group links.
- Country team exercises to begin planning a training event using the TRC.

³ Copies of the TRC Workbook are available from USAID Development Experience Clearinghouse, 1611 N. Kent Street, Suite 200, Arlington, VA 22209. Tel: 703-351-4006, Fax: 703-351-4039, <http://www/dec.org>. Document ID/Order Number: PN-ACF-889.

Training-for-Results Chain

For the first TRC exercise, the group members divided into country teams:

- Group 1: Macedonia
- Group 2: Bosnia and Croatia
- Group 3: Slovakia and Albania
- Group 4: FRY, Bulgaria, and Romania

and then completed the following tasks:

1. Review the R4 and the Strategic Objectives, Intermediates Results and Indicators from the missions represented.
2. Identify which of the SOs and IRs have training as part of the Result Package.
3. Select one SO/IR to focus on.
4. Identify a Partner Organization and/or Work Group that is working on the SO/IR selected.
5. Enter the information on the Banner Map provided.

In the early afternoon, each group shared the results of their work on the Banner Map through a quick report out. Following clarifications and discussion, the facilitators introduced the second part of the TRC Planning Phase – the Training Applications, Trainee Learning, Training Event, and Training Management links. The country teams then continued to plan a training event (or series of events) by completing the final part of the Planning Phase Banner Maps.

Their task was to return to the country groups and

1. Identify the Knowledge and Skills that will be needed by members of the Working Groups for whom the training is being developed.
2. Write Objectives, based on the Knowledge and Skill needs identified.
3. Identify any special considerations that were necessary, such as the number of training events that would be required to achieve the objectives.
4. Review the SO/IRs to make sure the training objectives are relevant.

By the end of the afternoon, each group had completed a banner map that targeted a specific SO and IR.

- | | | |
|------------------------------------|--------|---|
| ▪ Macedonia: | SO 2.1 | Increased citizen's participation |
| ▪ Bosnia and Croatia | SO 2.1 | Increased, better informed citizen participation in the political process |
| ▪ Slovakia and Albania | SO 3.2 | Improved sustainability of social benefits and services |
| ▪ FR Yugoslavia, Bulgaria, Romania | SO 3.3 | Mitigation of adverse social impacts of the transition to market based economies (New SO) |

Group work was presented during a final plenary session. (See Attachment 3 for the completed Banner Maps.)

Day 3, Wednesday, November 3, 1999

Wednesday's Agenda

- Linking the TRC to the TEOL
- Programmatic Issues
- Site Visits

Linking the TRC to the TEOL

On Wednesday morning, the group participated in a hands-on training session linking the TRC to the TEOL system, led by Aileen Kishaba.

The objectives of the session were to:

- Describe the four areas of the TEOL system (Repository, Training Event Request Form, Executive Narrative, and Summary Table) and their purpose in an E&E Training Plan.
- Transfer TRC exercises from the banner maps to the appropriate TERF sections of the TEOL.
- Demonstrate the ability to use the revised and improved TEOL system.

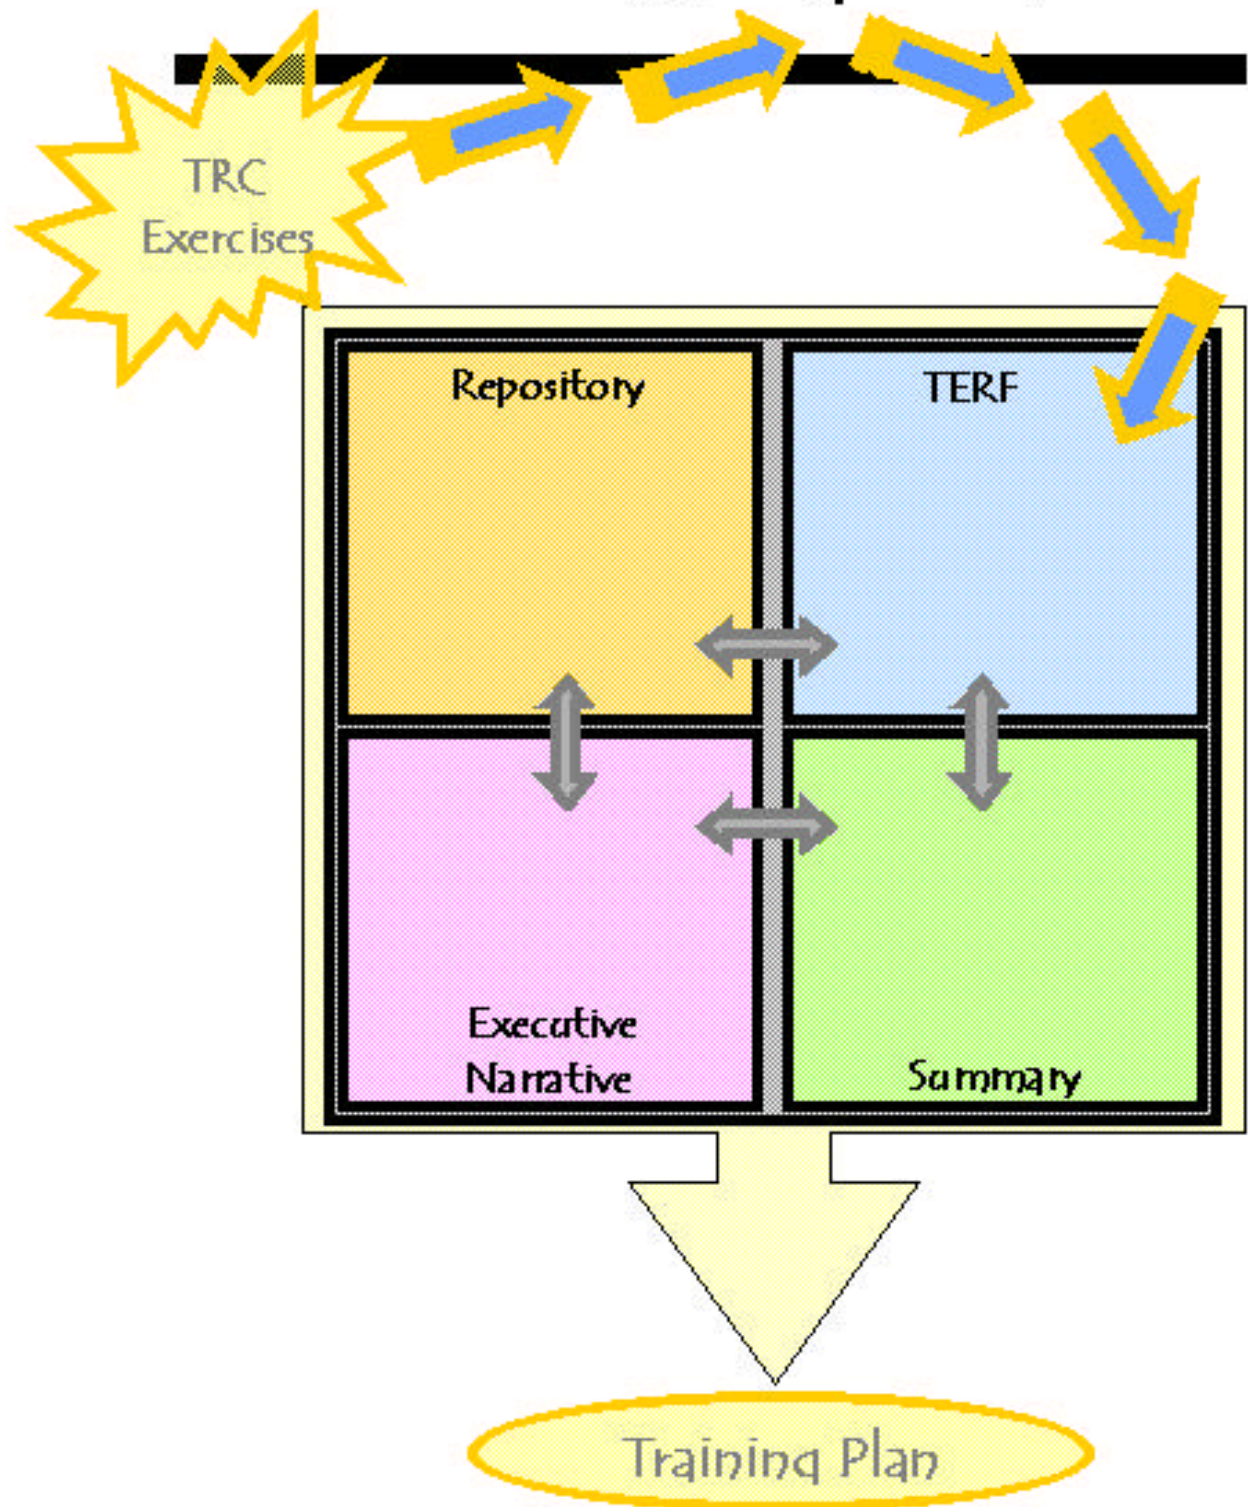

It was noted that the TEOL can be used to:

- Share Training Plans among Missions (to help trigger ideas for potential training events, formulate regional training events, and coordinate cross-cutting training events),
- Standardize a process which models/reflects the critical thinking used in the Training-for-Results Chain, and
- Streamline the approval process – while still allowing for hardcopy if preferred.

The TEOL session included a brief lecturette on the four components of the TEOL system (see diagram on the next page) and a practice session on computers that had been programmed with the TEOL system to allow the country teams to begin developing a training event on-line. Each group member received a copy of the revised *TEOL User's Guide and Tutorial*⁴ as a reference.

⁴ Copies of the *TEOL User's Guide and Tutorial* are available from the USAID Development Experience Clearinghouse, 1611 N. Kent Street, Suite 200, Arlington, VA 22209. Tel: 703-351-4006, Fax: 703-351-4039, <http://www/dec.org>. It may also be downloaded from <http://www.enitraining.net>.

TEOL - New and Improved !!!

Programmatic Issues

After lunch, the programmatic issues and questions identified by the group on Monday afternoon were discussed. The discussion continued on Thursday morning.

Site Visits

The remainder of the afternoon was spent on site visits. Romania / WL staff had arranged for the group to visit one of two former trainees who had participated in USAID-funded training. One group visited the Gavroche Center, a home for street children in Bucharest. The other group visited Kasta Metal, a woman-owned small enterprise specializing in pools and saunas. The visits provided an opportunity for group members to see the impact of USAID-funded training.

Day 4, Thursday, November 4, 1999

Thursday's Agenda

- Programmatic Issues
- Monitoring and Evaluation phase of the TRC
- In-house meetings for USAID and World Learning staff
- Traditional Romanian dinner

Programmatic Issues

Thursday morning was spent in a facilitated discussion of the programmatic issues and questions identified by the group members on Monday afternoon. The topics discussed included:

1. Expectations for use of the TEOL.
2. Clarification on the use of TraiNet.
3. Clarification on the expectations for WL to comply with the inter-agency working group cable requesting data on trainees.
4. Discussion of the E&E Training Manual – what it should include and how to get field input into the development of the revised manual.
5. Lead time for training programs – the importance of providing adequate lead time to allow for quality planning.
6. Monitoring and Evaluation of participant training results.

The group spent the morning discussing the issues and identifying next steps that are needed to clarify the issues.

Monitoring and Evaluation (M&E) Phase of the TRC

The final workshop session on Thursday focused on the Monitoring and Evaluation (M&E) phase of the TRC.⁵

The objectives of the session were to:

- identify possible ways to use the TRC to support the monitoring and evaluation of training, and
- review the components of a performance monitoring plan for training and discuss possible applications to the monitoring and evaluation of training.

The M&E phase can be used to identify the effects of training interventions on both the individual trainee and the partner organization and work group. The M&E data can be used to support TraiNet and the annual R4 process.

The group discussed the fact that the Performance Monitoring Plan for Training (PMP-T) is a tool that can be used to plan and manage the collection of performance data related to training. The process involves summarizing exit interviews, success stories and other data so that key findings are available to plan the next series of training events and inform the R4 process.

⁵ The M&E phase of the TRC is explained in Chapter 5 of the TRC workbook.

Group participants noted that using the PMP-T to summarize information will

- provide timely information that allows greater participation in a Mission's strategic planning processes
- help raise the visibility of training in the mission, and
- show that training can support the achievement of Mission SOs.

The eight steps of the Performance Monitoring Plan for Training can be found in Attachment 4.

Afternoon Concurrent Sessions

USAID staff and World Learning staff participated in internal meetings for the rest of the afternoon.

Traditional Romanian Dinner

Thursday evening, the group reconvened for a traditional Romanian dinner.

Day 5, Friday, November 5, 1999

Friday's Agenda

- Suggestions to Improve TEOL
- Update on Proposed Regional Center for Excellence in Human Capacity Development
- Concurrent Discussion Sessions
 - In-country Training (ICT)
 - Leaving a Legacy / In-country Capacity Building
 - Monitoring and Evaluation of Training
- Application Plans
- Workshop Evaluation and Closing Ceremonies

TEOL Suggestions

As a follow-up to Wednesday's session on the TEOL, the group spent the first ½ hour of Friday morning identifying specific improvements needed in the TEOL to make it more useful for field staff.

Some of the more consistent suggestions included:

- Development of a section that allows discussion of follow-on activities.
- A way to keep certain sensitive information from being shared with the general public (such as performance gaps, background information, special considerations).
- Modification of the approval section, including adding position titles, levels of approval, and correct approval authority.

A complete list of the suggestions generated at the workshop to improve the TEOL can be found in Attachment 5.

Proposed Regional Center for Excellence in Human Capacity Development (HCD)

Sandy Shumway presented an overview of the draft concept for the Regional Training Center now under consideration in Bulgaria. She pointed out that a major purpose of the center would be to sustain support of USAID objectives in the CEE by strengthening local training capacity and encouraging regional networking, collaboration, and problem solving. The Bulgaria Mission is investing resources and is interested in additional input from other Missions in the region.

The key goals of the proposed Center might be to:

- Institutionalize training capacity to support E&E's strategic objectives.
- Strengthen human resource capacity required to address regional problems by building sustainable cross-border networks and partnerships.
- Establish a regional HCD information clearinghouse.

Following the presentation, table groups were asked to discuss three questions that would help in the development of the concept paper for the center. The questions were:

1. What needs do you, as training managers have that might be addressed through the proposed center?
2. What knowledge, skills, experience or other resources exist in CEE, E&E, Global/HCD or the US that would benefit training providers in your country/context?
3. What role might the center play in facilitating cross-border approaches to problem-solving?

Each table group reported their reactions. Examples of responses on the role that a Regional Center could play included:

- Identification and training of local and regional training providers.
- Institutional strengthening.
- Work on concrete cross-border SOs, particularly SOs shared between Missions.
- Use of other U.S. players in the region.
- Providing “survival” training for training institutions to help them be more sustainable.

Concurrent Discussion Sessions

The objective of the next session was to provide an opportunity for participants to discuss one of three topics in detail. The three topics included:

- In-Country Training
- Leaving a Legacy / In-Country Capacity Building
- Monitoring and Evaluation

(See Attachment 6 for the discussion questions)

In-Country Training Group Report

1. Definition of ICT

Definition of In-country Training includes

- capacity development (of individuals and institutions), and
- institutional strengthening (including technical assistance).

There are three types of ICT

- conferences,
- courses, and
- HCD packages (workgroups, task forces, institutional linkages)

2. What do we need to do differently?

- More flexibility in defining participants.
- World Learning staff need to be more involved in planning ICT.
- WL staff could work as adjunct training providers.
- Streamline paperwork procedures.

Legacy Group Report

1. Defining Legacy – how would we know we were successful?
 - The legacy we leave should be individuals and institutions able to deal with problems.
 - Organizations USAID has worked with would be doing something better, more effectively and efficiently.
 - The four Cs of legacy: building confidence, courage, chutzpah and capacity to identify and solve new problems.
 - The Bureau needs to concentrate on leaving a legacy of knowledge, skills, and attitudes, not just infrastructure or institutions.
2. Benefits of training to the U.S. – builds strategic allies, trading partners, U.S. jobs.

Monitoring and Evaluation Group Report

1. Type of information that is useful to missions for reporting results.
 - Missions and training providers need to go back to the results framework to see how training is supporting results - “what outcomes have been achieved because of training?”.
 - The Audit Evaluation Program Support (AEPS) is a mechanism to monitor training results.
2. What are information needs for Mission Training Plan
 - The training plan has to help Mission Directors understand how resources will be used. It should be laid out by SOs.
3. Specific M&E tools that help support Mission and Bureau information needs.
 - Success Stories: Missions are not interested in Success Stories. This is a need from Washington.
 - The missions need input for the R4. The bottom line is making good progress toward achieving the SOs.
 - The information from training providers should focus on how training actually helped move a Strategic Objective.

Application Plan

The final group activity of the workshop was development of a back-home application plan. The group reconvened in their regional work groups and discussed what they plan to do when they go back to their work, particularly their application of the TRC and TEOL to the development of this year’s Mission Training Plan.

After brief discussion, each team shared their action plans:

Team 1

Albania: Plans to use the banner map to discuss new SO (3.3.3.) with Mission and Technical Assistance (TA) contractors.
Plans to send a staff person to Bosnia to learn about the M&E protocol being used there.

Lithuania and Slovakia:

Plans to use banner map as a planning tool and make a presentation to other staff on results of workshop.

Team 2

Bosnia: Plans to replace current training form with TEOL – to use as a framework for design of training. Plans to give copies of TRC chart to all partners (USAID, TA) who are involved in training design. Plans to use PMP-T format to make executive summaries of relevant material.

Croatia: Same as Bosnia, plus plans to put training plan into TEOL and wants to bring someone from Bosnia to train on follow-up interview protocol.

Team 3

Macedonia: Plans to work closely with SO teams on training plan. Will wait on implementation of TEOL to see if changes are made. Wants to implement follow-up interview protocols, but needs more staff.

Team 4

Bulgaria: In the process of developing a means to work more closely with SO teams, including making sure training links to the IRs, helping them identify training needs more effectively, discussing how many participants need to be involved in training in order to have a critical mass.

Plans to help SO team leader defend Regional Center in January.

Will use banner map. Mission is not on-line with TEOL so will wait on that.

Workshop Evaluation and Closing Ceremonies

Before adjourning, the group was asked to evaluate the workshop. Responses indicated that group members found the workshop very useful. Selected comments included:

“The workshop format works much better than the conference format.”

“Excellent – materials terrific, everything well organized and thought out”

“It was good – a bit too long. If it were shorter, maybe we could get more USAID program officers”

“Good because it was very participatory, hands on. Few talking heads”

“Individual presentations were extremely useful and productive”

“TRC was excellent – banner is a good tool”

“Enjoyed the TRC exercise and will use the banner map (and share it) with mission and TA staff”

“Still need more training and clarification on TEOL”

“Very relevant – 80% useful for me at the field level”

“Very good design overall. Excellent facilitation”

Closing Ceremony

Jim Nindel and Colin Davies distributed certificates to everyone attending the workshop as well as two group photographs. Both thanked the organizers, participants and facilitators for their efforts.

The workshop was adjourned.

**USAID/E&E Bureau
Regional Training Workshop
Bucharest, Romania
November 1- 5, 1999
Workshop Agenda**

Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
8:00 Registration 9:00 Opening Session ♦ Welcome – Denny Robertson and Jim Nindel ♦ Introductions ♦ Agenda and Objectives ♦ Logistics 10:15 BREAK 10:30 View from D.C. - Jim Nindel (20 min presentation /10 min QandA) 11:00 Country Presentations -10 min presentations on recent innovative practices / events, by USAID/WL teams	9:00 Overview of the Day 9:05 Training for Results Chain - Planning Phase ♦ Small Group Activity ♦ Objectives of Training Session ♦ Overview of the TRC workbook 10:30 BREAK 10:45 Review of TRC Links 1-4 11:30 Small Group Activity Links 1-4 exercises	9:00 Overview of the Day 9:05 Linking the TRC to the TEOL - Aileen Kishaba 10:00 Small Group Activity – TRC/TEOL exercises 10:30 BREAK 10:45 TEOL / TRC group work, con't 12:00 Review of Morning / Overview of Afternoon	9:00 Overview of Day 9:05 Programmatic Issues: Jim Nindel, Jeff Shahan, Colin Davies 10:30 BREAK 10:45 Programmatic Issues, con't 12:00 TRC Monitoring and Evaluation Phase	8:30 Overview of the day 8:35 Brainstorm TEOL Suggestions 9:00 Regional Training Center Update – Sandy Shumway 10:30 Break 10:45 Concurrent Discussion Session: ♦ Group 1: In-country Training ♦ Group 2: In-Country Capacity Development ♦ Group 3: Monitoring and Evaluation 12:00 Group Reports 12:45 Application Plans	World Learning Meeting
Lunch	Lunch	Lunch	Lunch		
1:30 Country Presentations, 3:00 BREAK 3:15 Introduction of Programmatic Issues - Jim Nindel, Jeff Shahan, Colin Davies 4:00 Small Group Activity – Identification of additional programmatic issues to be discussed during week. 5:00 Overview of Tuesday Adjourn	1:30 Small Group Activity, con't Exercises for Links 1-4 2:00 Group Reports 2:45 BREAK 3:00 Overview of Links 5-8 3:45 Small Group Activity- Complete selected TRC exercises for Links 5 –8 4.:45 Group Reports 5:15 Review of Day /Overview of Wednesday /Adjourn	1:30 –2:30 Programmatic Issues - Jim Nindel, Jeff Shahan, Colin Davies 2:30 Overview of Site Visits - WL/Romania Staff 3:00 BREAK 3:15 Site Visits - Gavroche Center - Kasta Metal	2:00 Concurrent Sessions: ♦ USAID Staff – Training Management Issues - Jim Nindel and Jeff Shahan ♦ World Learning Staff - Colin Davies	1:15 Group Reports 1:45 ♦ Workshop Evaluation ♦ Certificates /Closing Remarks 2:30 Adjourn / Lunch	
6:00pm WELCOME RECEPTION			8:30pm ROMANIAN DINNER		

TRC Planning Phase Banner Map

TRC Planning Phase Banner Map

**Slovakia and
Albania**

SO:

(3.2) improved sustainability of social benefits and services

**Donors/TA
Contractors:**
SEATS
AIHA
UNFPA

IR:

(3.2.1) Modern reproductive health service improved through improved access to information, access to services and improved quality of services

Indicator:

people exposed
#client visits
#service providers trained

Partner Organizations/Beneficiaries:

private clinic owners
OBGYN clinics
Medical university professors
Existing OBGYN associations

Local Private clinic
owner/operators

Work Group

Local Directors of
OBGYN clinics

Work Group

Professors of local
medical universities

Work Group

Knowledge needed:

Low-cost diagnostic and treatment options
preventative measures and their application
medical standards and ethics
accessing professional information

Performance Gaps/Potential Trainees:

Bedside manner, diagnosis, treatment, preventative care, patient education, patient confidentiality, professionalism, accessing professional information

Skills needed

Communication with partners
use of equipment

Attitudes needed:

physician/patient
partnership
for wellness

Learner-Centered

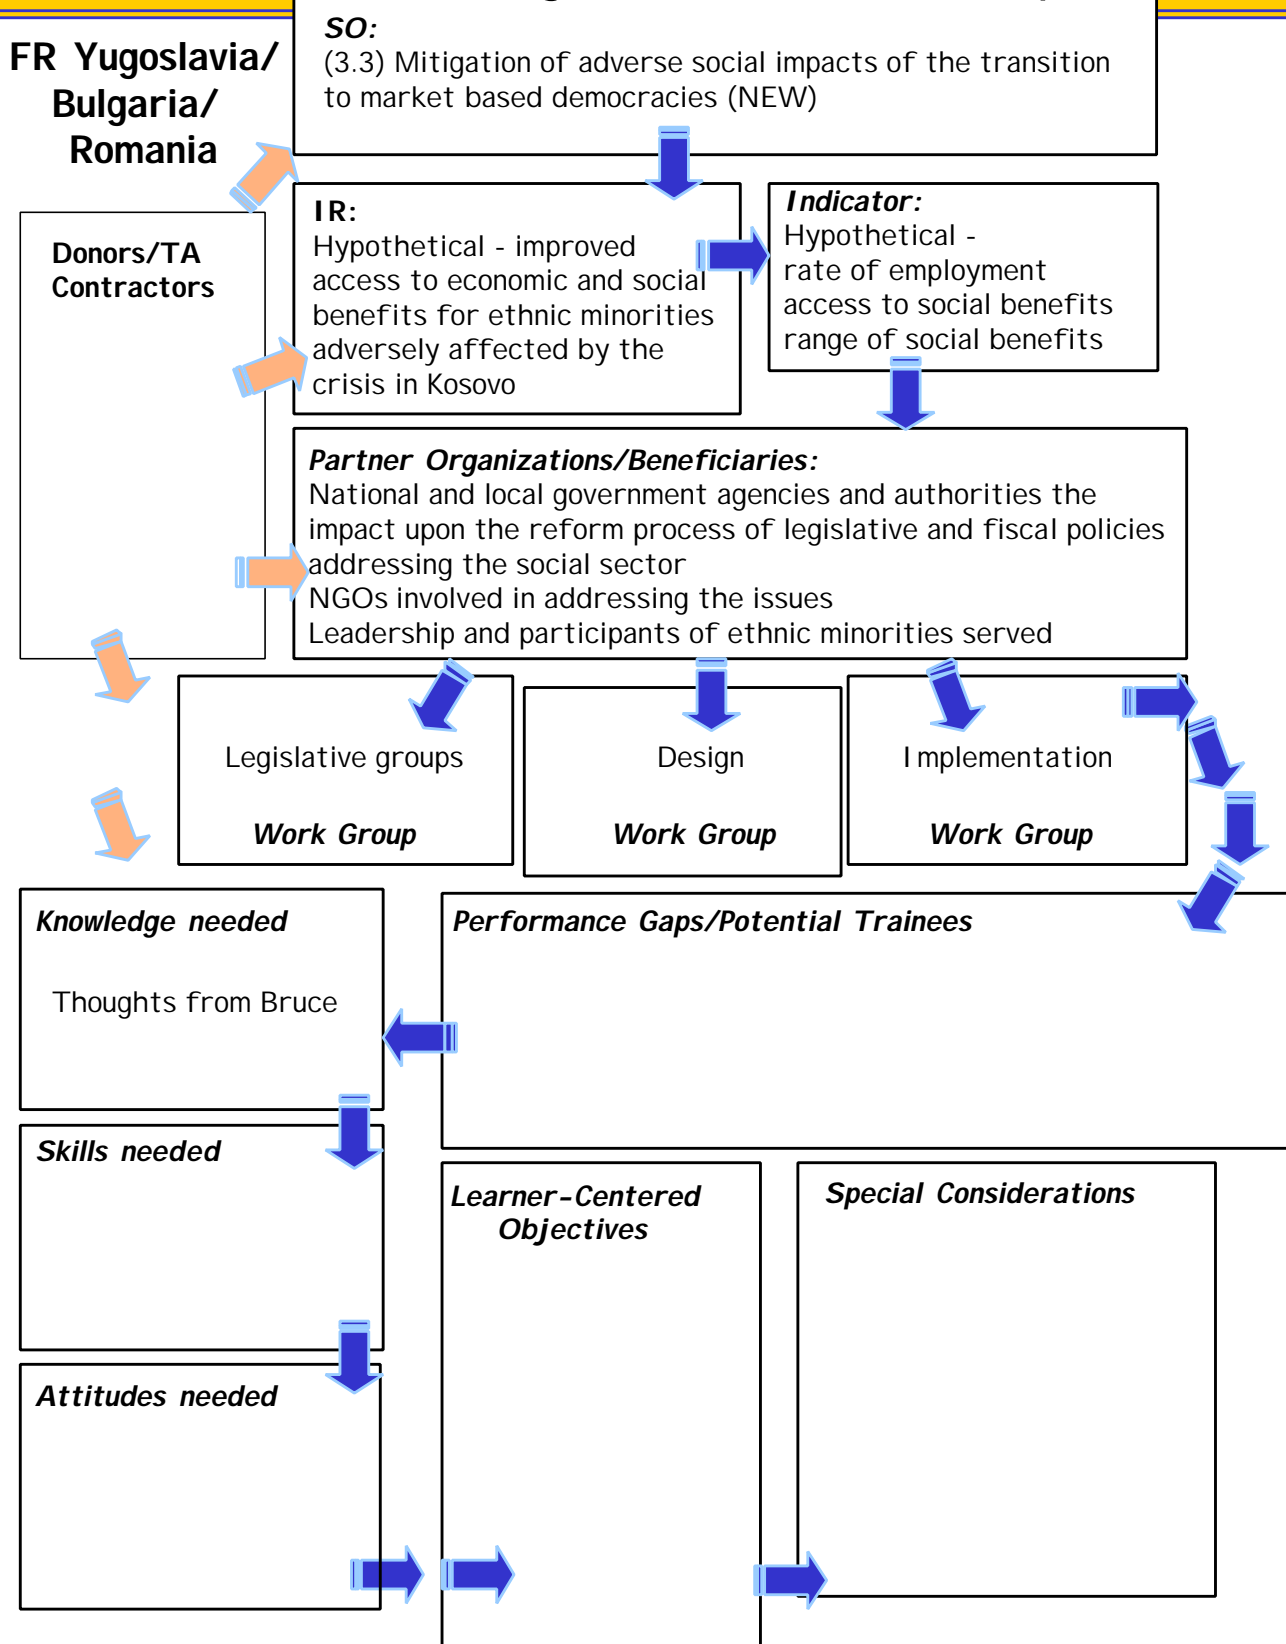

Objectives:

I identify low-cost diagnostic and treatment options
I identify preventative measures
I identify sources of up-to-date professional information
I identify the elements of wellness partnerships
Compare/contrast patient/physician communication

Special Considerations:

over 60% practical shadowing experiences
large urban setting/rural
low-cost setting
Later ICT

TRC Planning Phase Banner Map

Attachment 4

Components of the Performance Monitoring Plan for Training (PMP-T)

Part 1: Performance Monitoring Plan for Each Targeted Strategic Objective and Intermediate Result

Part 2: Baseline, Expected Results, and Actual Results for Each Targeted SO/IR

Part 3: Summary of Final Training Event Reports

Part 4: Summary of Major Conclusions from Follow-up Interviews

Part 5: Summary of Success Stories

Part 6: Summary of Complementary Evaluations

Part 7: Targeted SO Narrative

Part 8: SO 4.2 Narrative

Attachment 5

Specific Recommendations to Improve the TEOL

Table Group One

- Block out sensitive boxes to public: history, performance gaps, for example.
 - If only country name and training event name are required, where is the impetus to use this tool rather than what missions are already using?
 - Add TCT, ICT... as event types
 - You are fixed on specific options: if a training event really is cross-cutting, how can the other SOs be indicated?
 - E.1. - wrong approval authority is given. See correct authority in ADS 253 and add to TEOL.
 - E.2. should include "interpreter provided" (not only waived or not needed).
 - Lacks box for follow-on activities which are part and parcel of the training event.
 - Confusion between training event only results and impact expected in work place.
-

Table Group Two

- Mission training plans page should indicate whether the training event is UST, TCT or ICT. If possible, remove "status" and "quarter" info and include TCT location.
 - Give the editor /creator the option (for each box) to indicate whether information can be shared or should be hidden (so that not everyone in the general public has access).
 - Editors /creators should provide as much background information as possible in relevant fields (e.g. history of assistance, other support activities, history of program that this event supports, etc.). This is extremely helpful in designing requests for training proposals.
-

Table Group Three

Advantages and Disadvantages of the TEOL

(+)	(-)
1. Info sharing	Confidentiality issues Sharing vs. protect
2. Standardizes and streamlines	Block sensitive fields e.g. performance gaps
3. Consistent with training	Flag public vs. non-public domain
4. Flexible, can be used by several offices simultaneously	Spell-check HSI-Tribal as % of UST Summary table Specify UST/TCT/ICT
5.	Follow-on field

Suggestions

- titles on TEOL may not be manual titles
- section "G" – Titles "Instructional trainee and travel cost" are not used in field
- why include section "F" ?

- add a section for “planned follow-on”
 - in approvals section, think about adding position titles (SO team leader, program officer...)
-

Table Group Four

- Access - needs to be tested
 - the delete function is needed at field level
- Approval boxes - need concept approved
 - final approval
- Need to be able to limit sensitive information to public on completed programs. For example:
 - performance gaps
 - special considerations
 - some background information
- Need box for complementary activities
- Save function needs to be foolproof

Attachment 6

Concurrent Session Discussion Questions (Friday Morning)

In-country training:

1. How can we define in-country training and how is it different from technical assistance? What are the primary characteristics of ICT? (i.e. an activity that empowers people to do something. Trainees are the direct beneficiaries. It involves transfer of information.)
2. What are we currently doing well to address the issues and problems of implementing in-country training? What do we need to do differently?
3. What guidance and policies are needed in the E&E Training Manual to ensure the quality of in-country training?
4. When TA contractors provide training, what can be done to ensure that they follow Bureau policy and procedures?

Leaving a Legacy / In-country Capacity Building:

1. In what different ways can legacy be defined? What are some possible examples of a legacy? How can TCT and ICT contribute to legacy?
2. How can we increase our support for the development of local capacity to provide training and logistics under current mechanisms.
3. What are the benefits and constraints to using local providers for training and logistics? How can the constraints be overcome?

Monitoring and Evaluation:

1. What information is useful to Missions for reporting the results / impacts of training and the relationship of training to achieving SOs and IRs?
2. What can be done to more effectively synthesize / summarize the impacts of results packages (combination of Training, TA, other inputs) on the achievement of IRs and SOs?
3. What kind of information needs to be included in the Mission training plan that will enhance the ability of USAID and WL to measure the impact of training on the achievement of SOs and IRs?
4. What specific Monitoring and Evaluation tools and methodologies would help support Mission and Bureau needs for training impact information?
